

STEM AMBASSADOR SPOTLIGHT

Lillie McCarver
Biology

How did you select your college major? What was the biggest influence?

I chose biology because I enjoyed hands-on science during high school. The biggest influence for this choice is that I love being outside and interacting with animals.

What advice would you share with K-12 students who are considering your major?

I would encourage people considering this major to get involved in what they can before starting college so that they will be prepared.

What high school elective course do you wish you had taken to better prepare you for college?

I wish I had taken the greenhouse class my high school offered.

When you aren't in class or studying, what can you be found doing in your spare time?

In my spare time, I like to spend time with my friends. I also enjoy repainting old furniture.

What motivates you to get out of bed and go to class every day?

I am motivated by the opportunities my degree will open up for me once I am finished.

How do you or your major make a positive impact on society/our community?

I believe biology students make a positive impact on society by educating people on how to take care of the environment we live in.

What do you look forward to the most while being a STEM Ambassador?

I am most excited to work with kids and show them how much fun STEM activities can be.
