

STEM AMBASSADOR SPOTLIGHT

Sydney Mitchell
Mechanical Engineering

How did you select your college major? What was the biggest influence?

I selected my STEM major because I always excelled in the science and math fields. My biggest influence was the desire to know how things worked.

What advice would you share with K-12 students who are considering your major?

My best advice to someone considering my major is have good time management skills and ask for help when needed.

What high school elective course do you wish you had taken to better prepare you for college?

I wish I had taken more math classes.

When you aren't in class or studying, what can you be found doing in your spare time?

I think it is very important to be active so when I am not in class I can be found skating around campus, or hanging out with friends.

What motivates you to get out of bed and go to class every day?

The desire to build a better future for myself.

How do you or your major make a positive impact on society/our community?

Mechanical engineers, like all engineers, are responsible for increasing the quality of life that we all have.

What do you look forward to the most while being a STEM Ambassador?

I look forward to helping kids learn about the opportunities the STEM field provides. It is something that I wish I had when choosing my major.
