

STEM AMBASSADOR SPOTLIGHT

Madison Mobley
Civil Engineering

How did you select your college major? What was the biggest influence?

I selected my major because of how intriguing it seemed and had a lot to offer. The Assistant Dean, Engineering Student Services & Diversity Isaiah Surbrook was the one who convinced me to pursue civil engineering at Memphis.

What advice would you share with K-12 students who are considering your major?

It can be very difficult, but as long as you stay determined and find the best way for you to learn, the hard work will be worth it.

What high school elective course do you wish you had taken to better prepare you for college?

I don't think changing my elective would've prepared me for this degree.

When you aren't in class or studying, what can you be found doing in your spare time?

I would most likely be either painting, playing games with my siblings, or playing with my 2 Great Danes and 1 Chihuahua.

What motivates you to get out of bed and go to class every day?

The excitement to learn and knowledge that I have a great support system if I need any help.

How do you or your major make a positive impact on society/our community?

Civil engineers are the building blocks of society making living for people easier.

What do you look forward to the most while being a STEM Ambassador?

I cannot wait to make an impact on children and give them the chance I did not have to learn more about engineering.
